

General Dynamics UK has more than 20 year's experience of manufacturing and integrating shelters for customers worldwide, including the UK Ministry of Defence and NATO.

Working to the highest of standards, we are able to deliver solutions to meet the varied needs and requirements of our customers, with the capability of constructing shelters with either aluminium or steel.

**General Dynamics United Kingdom Limited is a global provider of security and resilience solutions which are successfully delivered through our innovation, knowledge, skill and integrity.**

Using a mix of our in-house technologies and commercially available off the shelf products; in conjunction with over 40 year's systems integration and installation experience; we deliver solutions to government agencies, the critical national infrastructure sector and border control agencies.

We have two production facilities – in the UK and Turkey, with more than 100,000 sq feet production space.

**The production facilities are supported by our sites across Europe, and can offer:**

- System design
- Sheet metal cutting and welding
- Pressing and assembly of panels
- Surface preparation and painting
- Cable loom design and manufacture
- Equipment installation
- Final testing, qualification and certification.

**Compliant with:**

- NATO I - II - III,
- ACE I – II – III,
- MILSTD, DEF STD,
- STANAGs,
- IEEE and ISO standards.

World-class design teams are able to develop the right container to meet your needs:

**Examples of current uses include:**

**Temperature Controlled Storage**

- Secure storage of medical products (blood, fresh frozen plasma and cryoprecipitate) in the battlefield
- Simultaneous management of multiple temperature zones
- Deep frozen, refrigerated and ambient
- Ensures products are available for immediate use by medical staff at the front line.

**Battlefield Hygiene Systems**

- Wash, shower and latrine facilities
- Essential for morale and welfare of troops.

**Force Protection Systems**

- Multi-layer force protection through the use of integrated sensors
- Multiple configurations supporting differing operations
- Protection of key points
- Main and Forward Operating Bases.

**Testing capabilities include:**

- Dimensions
- Squareness
- Flatness
- Weight
- Impact resistance
- Overpressure
- Rain
- Fording
- Salt fog
- Floor load
- Roof load
- Corner tensile
- Vertical drop
- Rotational drop
- Towing, bearing
- Door load
- Folding steps
- Air tightness
- RFI/EMI
- EMP (simulation)
- Heat co-efficient
- Transportability
- Shielding
- Tempest
